

2023 Drainage Improvements Project

JACKSON AVENUE BIOSWALE AND SPILLWAY

PROJECT DESCRIPTION: On behalf of the Village of Wauconda, Concept Plumbing will be completing work at the Jackson Avenue spillway (at Jackson Ave and Sheridan Dr). There will be two-phases to this project including the revitalization of the existing natural ditch (bioswale) and reinstatement of the existing concrete spillway. The bioswale has the capacity to manage water flow for lighter rains, however, the spillway is necessary to handle the outfall from larger rain events. The goal is to reinforce the bioswale, naturally slow the flow and clean the stormwater discharge that enters the Circle Channel.

REVITALIZE BIOSWALE
