

## MILL STREET STORM SEWER IMPROVEMENTS

**PROJECT DESCRIPTION:** The Mill Street Storm Sewer Improvement Project consists of rerouting the Village’s storm sewer away from Bangs Lake Condominiums HOA beach and the filtering of stormwater before it flows in to Bangs Lake. The water quality filtering structure will be installed at the upstream end of the Mill Street storm sewer, located in the easement between E. Mill Street and the entrance to Bangs Lake Condominiums. This structure will remove sediment, hydrocarbons, and debris prior to draining into the lake. Additionally, the redirection of the storm sewer will create a more usable and safer environment for the Bangs Lake HOA residents. Village staff will maintain and remove all deposits to ensure proper flow.
